Panacea Update Manager Version 3.3 Released

Latest Version Includes SCCM Compatibility and Expanded Network Architecture Support

Montgomeryville, PA (April 25, 2018) – Panacea Technologies announces the release of Panacea Update Manager version 3.3. Version 3.3 includes compatibility with Microsoft’s System Center Configuration Manager (SCCM), full support of Mixed Mode architectures containing upstream and downstream servers (see diagram below), and updates to GE recommended patch definitions.

The latest validation documentation and installation manuals will be released simultaneously. For more information on Panacea Update Manager visit <https://www.panaceatech.com/products/updatesmanager>.
