Panacea Announces synTQ Partnership

Application Partner Status and OEM Partnership Strengthens Enterprise Offering

Montgomeryville, PA (October 15, 2018) – Panacea Technologies is pleased to announce a formal partnership with Optimal Industrial Automation’s synTQ platform as both an Application Partner and an OEM partner through Panacea’s OpenBIO Fermenter Control System.

Being named an Application Partner certifies Panacea’s ability to deploy, support, and integrate the synTQ platform across a variety of applications within the regulated Industries for both data collection, processing, and control. The OEM partnership certifies the ability of OpenBIO, Panacea’s award-winning fermenter control system, to integrate with synTQ on a premier level.

synTQ is an Industry leading PAT (Process Analytical Technology) platform allowing for high level data analysis and multi-variate process control. For more information on synTQ please visit <https://www.syntq.eu/about-syntq/>.
